FOR IMMEDIATE RELEASE

New *iGR* study forecasts maturing global tablet markets

Tablets will continue to be adopted for both business and personal use

AUSTIN, Texas, February 12th, 2015 – Tablets have become a significant computing device for many consumers. The popularity of tablets hinges upon their versatility, connectivity and comparably low price. In addition to personal use, tablets are being used in many sectors including education, health care, financial services and transportation.

The tablet market has matured and during 2014 growth in tablet sales was significantly lower than in the previous three years. These slowing sales are primarily due to the fact that consumers seem to be replacing and upgrading their tablets less frequently than their smartphones. *iGR* expects expansion of tablet sales during the forecast period, but at a slower pace than in the early years of this market.

“Many factors will drive the continued sales of tablets globally,” said Iain Gillott, president and founder of *iGR*, a market research consultancy focused on the wireless and mobile industry. “First and foremost is consumers’ reliance on the versatility and connectivity of tablets for their personal use. Secondly is the expanding use of tablets for business applications.”

iGR’s new market research report, [Global Tablet Sales Forecast, 2014-2019: *Slowing Growth*](#), previews the expected worldwide sales of tablets for 2014 to 2019. Sales are forecasted by mobile operating systems, form factors (7-inch vs. 10-inch) and connectivity options (embedded WWAN vs. WiFi-only). The sales numbers are forecasted globally, as well as for each of the following six regions: North America, Latin America, Europe, Middle East and Africa, Asia-Pacific, and Japan. This market study also overviews some of the major tablet OEMs, as well as the trends driving this growing market.

The following key questions are addressed in the new research study:

- Which OEMs currently provide tablets to this market?
- What are the current drivers of sales in the tablet market worldwide?

- What are the anticipated global tablet sales for 2014 to 2019, both globally and for North America, Latin America, Europe, Middle East and Africa, Asia-Pacific, and Japan?
- What are the anticipated sales for each mobile operating system both globally and for each region of the world?
- What are the anticipated sales for each tablet form factor (7-inch and 10-inch) both globally and for each region of the world?
- What are the anticipated sales for tablets, according to the presence of an embedded WWAN or a WiFi-Only connection, both globally and for each region of the world?

The information in this market study will be valuable for:

- Mobile operators
- Mobile device OEMs
- Mobile content providers and distributors
- Financial analysts and investors.
