FOR IMMEDIATE RELEASE

***iGR* to launch its Wi-Fi Services Sponsored Research report**

Report will be third in iGR's new series of Sponsored Research

AUSTIN, Texas, April 24th, 2015 – *iGR*, a market research consultancy that has focused on the wireless and mobile industry for the past 15 years, is launching a new series of Sponsored Research reports. The third report, focused on Wi-Fi services, will draw from a detailed U.S. Consumer Primary Survey and present original, differentiated data that is completely exclusive to the sponsored report.

Wi-Fi networks and services are now common outside the home or office; consumers connect in a variety of locations to access their movies, music, emails and more. Many service providers, including the cable MSOs, offer Wi-Fi networks and either use the service as a value-add or to generate revenues.

The third report of the Sponsored Research series, ***Consumer Views on Wi-Fi Services***, will survey U.S. consumers to determine:

- How consumers use Wi-Fi services outside the home and office today.
- What devices consumers typically use when connecting to Wi-Fi.
- Which apps and services consumers use when connected to Wi-Fi and why.
- The demand for movies and music on Wi-Fi networks.
- The differences, if any, between Wi-Fi use and LTE use.
- The demand for Hotspot 2.0/Passpoint Wi-Fi network services.
- What can be done to improve consumer access, logins and user interfaces to Wi-Fi networks and services.
- The value of the Wi-Fi networks and services and how consumer use of LTE is impacted.

The report will present the results of the survey, along with detailed analysis and discussion, to show the demand for Wi-Fi networks and services from the consumer perspective.

In order to maintain exclusivity, *iGR* will accept sponsorship from a maximum of **FIVE** companies for this Sponsored Research report.

Once the primary research is complete and the ***Consumer Views on Wi-Fi Services*** report is written, *iGR* will interview each Sponsor and prepare a detailed profile of their company, strategy and product as required. Each profile will then be included in the Sponsored Research report.

Distribution of the report will be by *iGR* and each Sponsor. *iGR* will promote the Sponsored Research report on the home page of its website. *iGR* will also:

- Issue a press release announcing the availability of the Sponsored Research report.
- Issue a separate press release for each Sponsor, announcing their participation and including a quote from a Sponsor executive.
- Promote the Sponsored Research report to *iGR*'s current list of industry contacts.
- Promote the Sponsored Research report to one of the major wireless industry publication's email list and newsletter readers.

Each Sponsor will benefit in the following ways from supporting *iGR*'s Sponsored Research reports:

- Each Sponsor's brand will be prominently displayed on wireless and mobile industry thought leadership content.
- Exclusivity is limited to **FIVE** sponsors per report.
- Detailed company profiles of each sponsor will be included in the report to demonstrate product/solution leadership, etc.
- Each Sponsor's brand will be promoted through multiple channels including press releases, *iGR*'s distribution list and website, a webinar, and the newsletter/email list of one major wireless/mobile industry publication.
- Sponsors will have the ability to distribute the report as needed (after obtaining prior agreement with *iGR*), including posting to Sponsor's own website.
- Sponsors will have access to all leads generated by *iGR*'s promotion of the Sponsored Research report, including leads from the major wireless and mobile industry publication promotion.
- Sponsors will be able to participate in an *iGR* webinar to promote and discuss the research.

For more information on *iGR*'s Sponsored Research or the ***Consumer Views on Wi-Fi Services*** report, please contact Iain Gillott at (512) 263-5682 or at Iain@iGR-inc.com.

About *iGR*

iGR is a market strategy consultancy focused on the wireless and mobile communications industry. Founded by Iain Gillott, one of the wireless industry's leading analysts, in late 2000 as *iGillottResearch*, *iGR* is now in its fifteenth year of operation. *iGR* continuously researches emerging and existent technologies, technology industries, and consumer markets. We use our detailed research to offer a range of services to help companies improve their position in the marketplace, clearly define their future direction, and ultimately improve their bottom line.

iGR researches a range of wireless and mobile products and technologies, including: smartphones; tablets; mobile wearables; connected cars; mobile applications; bandwidth demand and use; small cell and het-net architectures; mobile EPC and RAN virtualization; DAS; LTE; VoLTE; IMS; NFC; GSM/GPRS/UMTS/HSPA; CDMA 1x/EV-DO; iDEN; SIP; macro-, pico- and femtocells; mobile backhaul; WiFi and WiFi offload; and SIM and UICC.

A more complete profile of the company can be found at www.igr-inc.com.
