iGR* announces New Interview Series – 10 Minutes with *iGR

Series is provided by iGR and The 2030 Project

AUSTIN, Texas, April 6th, 2020 – *iGR* and The 2030 Project have created a new series of short interviews with industry leaders. In the ten-minute interviews, *iGR* President and Founder Iain Gillott and an industry guest discuss the Wireless and Mobile Industry's latest technology trends, such as edge computing, private LTE and CBRS.

The 2030 Project, a new partnership between Tim Downs (SmartGig Media), Matthew Vartabedian and Iain Gillott (both of *iGR*), provides business media focused on building a community of like-minded vendors, end users, influencers, enterprise IT managers, executives and other decision-makers who support the changing wired, wireless and digital ecosystem.

The new series of interviews, [10 Minutes with *iGR*](#), is available to view on *iGR*'s new [YouTube Channel](#). For more information, or to ask any follow-up questions from the interviews, please email Iain Gillott at iain@igr-inc.com.

About *iGR*

iGR is a market strategy consultancy focused on the wireless and mobile communications industry. Founded by Iain Gillott, one of the wireless industry's leading analysts, in late 2000 as *iGillottResearch*, *iGR* is now in its twentieth year of operation. *iGR* continuously researches emerging and existent technologies, technology industries, and consumer markets. We use our detailed research to offer a range of services to help companies improve their position in the marketplace, clearly define their future direction, and ultimately improve their bottom line.

iGR researches a range of wireless and mobile products and technologies, including: 5G, 4G LTE, smartphones, tablets, connected cars, V2X and V2V, mobile applications, bandwidth demand and use, 5G small cell and het-net architectures, 5G new core virtualization, mobile EPC and RAN virtualization, edge computing, in-building wireless, CBRS, mmWave, spectrum farming, DAS, VoLTE, macro-, pico- and femtocells, mobile front/backhaul, WiFi and WiFi offload, and enterprise private LTE.
